João Mário Abreu

Belo Horizonte, Brazil • +55 (31) 97529-2283 • abreujoaomr@gmail.com
github.com/joaom-abreu • linkedin.com/in/joao-mario-abreu • joaomario.dev

Education

B.S. in Software Engineering *Expected: Dec 2029*
Pontifical Catholic University of Minas Gerais (PUC Minas)

Experience

Teaching Assistant – Computability *Oct 2026 – Dec 2026*
PUC Minas
Support undergraduate students in the Computability course, helping them understand the material and solve exercises.

Projects

Courtside API | Go, PostgreSQL, Docker *Oct 2026 – Present*
Personal project • github.com/joaom-abreu/courtside-api

- Building a REST API for NBA statistics in Go, using the standard library's net/http and PostgreSQL with the pgx driver.

Developer Portfolio Website | React, Vite, JavaScript, Vercel, Supabase *Oct 2026*
Personal project • joaomario.dev

- Built a personal website with React and Vite to showcase my projects, deployed on Vercel.
- Created a custom serverless endpoint that consumes the GitHub API to display my profile and recent activity.
- Track site visits with Supabase.

Scribd to PDF | Python, Playwright, img2pdf, OCRmyPDF, pytest *Sep 2026*
Personal project • github.com/joaom-abreu/scribd-to-pdf

- Built a Python command-line tool that uses Playwright to capture the pages of Scribd's reader and merge them into a single PDF, in the correct order.
- Implemented resumable captures and optional OCR with OCRmyPDF to make the PDF text searchable.
- Structured the code in layers (domain, application, infrastructure and CLI) and covered it with pytest tests.

Skills

- **Programming Languages:** Java, Go, Python, SQL
- **Backend:** Spring Boot
- **Databases:** PostgreSQL, MongoDB
- **DevOps & Tools:** Docker, CI/CD, Linux, Git, Vercel

Languages

- Portuguese – Native
- English – Advanced (C1)
- Spanish – Intermediate (B1)
- Mandarin – Beginner (A1)
