Education

B.S. in Software Engineering *Expected: Dec 2029*
Pontifical Catholic University of Minas Gerais (PUC Minas)

Experience

Teaching Assistant – Theory of Computation *Oct 2026 – Dec 2026*
PUC Minas
Support undergraduate students in the Theory of Computation course, helping them understand the material and solve exercises.

Projects

Courtside API | Go, PostgreSQL, sqlc, Docker *Oct 2026 – Present*
Personal project • github.com/joaom-abreu/courtside-api

- Building a REST API for NBA statistics in Go, structured in layers (domain, repository, service and handlers).
- Modeled teams, players, seasons and games in PostgreSQL, with versioned migrations and type-safe queries generated by sqlc.
- Wrote unit tests and set up the environment with Docker Compose.

Developer Portfolio Website | React, Vite, JavaScript, Vercel, Supabase *Oct 2026*
Personal project • joaomario.dev

- Built a personal website with React and Vite to showcase my projects, deployed on Vercel.
- Created a custom serverless endpoint that consumes the GitHub API to display my profile and recent activity.
- Track site visits with Supabase.

Scribd to PDF | Python, Playwright, Tkinter, img2pdf, pypdf, pytest *Sep 2026*
Personal project • github.com/joaom-abreu/scribd-to-pdf

- Built a Python app that uses Playwright to automate Chromium and merge the pages of Scribd's reader into a single PDF, in the correct order.
- Implemented a Tkinter GUI and a command-line mode, saving progress to JSON to resume interrupted captures.
- Added a page-count check before saving the PDF and covered the code with pytest tests.

Skills

- **Programming Languages:** Java, Go, Python, SQL
- **Backend:** Spring Boot
- **Databases:** PostgreSQL, MongoDB
- **DevOps & Tools:** Docker, CI/CD, Linux, Git, Vercel

Languages

- Portuguese – Native
- English – Advanced (C1)
- Spanish – Intermediate (B1)
- Mandarin – Beginner (A1)
