Education

B.S. in Software Engineering *Expected: Dec 2029*
Pontifical Catholic University of Minas Gerais (PUC Minas)

Experience

Teaching Assistant – Computability *Sep 2026 – Dec 2026*
PUC Minas
Help undergraduate students understand the Computability material and solve exercises.

Projects

Car Rental System | Java, Spring Boot, Spring Security, React, Supabase *Nov 2026*
Academic project • github.com/joaom-abreu/car-rental-system

- Built a Spring Boot REST API with Spring Security, JWT and role-based access for clients and agents.
- Wrote 61 tests with JUnit and Mockito, run in CI on GitHub Actions.
- Built the React front end, integrated BrasilAPI and deployed on Vercel and Render, with Swagger docs.

Cônci | Spring Boot, RESTHeart, MongoDB, React, TypeScript, Docker *Oct 2026 – Present*
Team project • PUC Minas

- Developing, in a team of four, a platform that connects clients with independent service providers.
- Work in sprints with Git Flow and help organize the team's tasks and deliverables.

Developer Portfolio Website | React, Vite, JavaScript, Vercel, Supabase, Docker *Oct 2026*
Personal project • joaomario.dev

- Built a bilingual (PT/EN) personal website in React and Vite to showcase my projects, deployed on Vercel.
- Created serverless endpoints that consume the GitHub API and log visits in Supabase without storing IPs.
- Containerized the project with Docker Compose and set up tests and CI on GitHub Actions.

Scribd to PDF | Python, Playwright, img2pdf, OCRmyPDF, pytest *Sep 2026*
Personal project • github.com/joaom-abreu/scribd-to-pdf

- Built a Python CLI that uses Playwright to capture Scribd's reader pages and merge them into one PDF.
- Implemented resumable captures and optional OCR with OCRmyPDF to make the PDF text searchable.
- Structured the code in layers (domain, application, infrastructure and CLI) and covered it with pytest tests.

Courtside API | Go, PostgreSQL, Docker *Oct 2026 – Present*
Personal project • github.com/joaom-abreu/courtside-api

- Building a REST API for NBA statistics in Go with net/http and PostgreSQL (pgx driver).

Skills

- **Programming Languages:** Java, Go, Python, SQL
- **Backend:** Spring Boot
- **Databases:** PostgreSQL, MongoDB
- **Testing:** JUnit, pytest
- **DevOps & Tools:** Docker, CI/CD, GitHub Actions, Linux, Git, Vercel

Languages

Portuguese – Native • English – Advanced (C1) • Spanish – Intermediate (B1) • Mandarin – Beginner (A1)
